

# ROADSIDE SURVIVAL

## LEARN HOW TO PREVENT AND DEAL WITH AUTOMOBILE BREAKDOWNS

Lessons and Advice from a Veteran of 2,000 Roadside Assists

200 million licensed motor vehicle drivers in the United States expose themselves routinely to significant risk, betting that they will not become stranded when they drive. There are two kinds of drivers: 1) those who have experienced a disabled vehicle (and will again), and 2) those who will for the first time. Drivers can decrease the chances that they will have a breakdown and become stranded. Each year AAA responds to 30 million calls nationally for help from stranded motorists, reflecting only a small fraction of the total. Some folks learn only by experiencing inconvenience, embarrassment, and potentially serious risks. Others make the proactive choice to learn how to prevent problems, and the methods to counteract them should they occur.

The book is an easy-to-read, unique collection of wisdom and practical advice from over 2,000 free-of-charge roadside assists the author has performed as a hobby, to empower drivers to prevent and contend with breakdowns – emphasizing safety. More than 20 anecdotes from actual assists, several humorous, introduce, illustrate and reinforce concepts and techniques. Includes 56 pictures and illustrations with captions. Solutions are simple, low tech, easily understood, and enable a driver of a disabled vehicle to drive it off an interstate highway or parking lot, to a facility which can fix the problem, or to obtain items needed to prevent recurrence.

**Common Reasons for Breakdowns: Tires, Electrical, Out of Gas, Overheating, Lockouts**
